Subject: RE: additional sub-task for ICPRB's FY15 CWA106 grant
MAIL_RECEIVED: Wed 5/27/2015 3:11:00 PM

Hi Claire-

Thanks for the heads up. I would like to make two requests. First, I would ask that any work that is done under this new subtask is captured in the end of the year report that you submit to us around October. Second, I would also like to request that you send me in writing (email is fine), a confirmation that taking on this task will in no way affect ICPRB's ability to meet the other agreed upon commitments in the approved FY15 workplan, or result in changes to the existing budget or shifting of 106 resources. It doesn't sound like any of this should be a problem, I just need to capture in writing within the grant files in case of an audit. Thanks for your hard work,

Mike

Subject: additional sub-task for ICPRB's FY15 CWA106 grant

Good morning Mike,

Just fyi. We are adding at no cost an additional sub-task (under Task 4) to our FY15 CWA106 workplan. VADEQ staff have requested further assistance from me in their ongoing James River chlorophyll a

criteria study. I participate in the study as a member of their Scientific Advisory Panel (which is already a 106 sub-task). They have asked me to review the various methodologies and analysis approaches used in the study to evaluate multiple, potentially harmful impacts of algal blooms, and to comment on the protectiveness of the existing James River chlorophyll criteria. The short report I am writing will be a product of our 106 grant. Contact me if you have any question. Thanks.

Claire
